How to, without getting a ticket,

## Find a parking space

By AMY BOYD

Everyone parking their cars in campus parking lots must have a valid parking sticker. Prices for these stickers range from \$6 to \$25, according to the distance from the campus center with the closest ones being the most expensive.

A parking sticker for a Red Lot costs \$25 for the calendar year and gains access to Lots 1, 2, 5 and 6. Gold Lot stickers are \$18 to park in Lots 4, 18 and 36. A Silver Lot sticker costs \$12 for parking in Lots 11, 17, 19 and 26. Green Lot stickers

are \$6 and these are remote from the main campus area (Lots 9, 12, 15 and 20).

Why is it so hard to get a sticker?

According to Chief Boulware of the University Police, various methods of handing out stickers have been tried but none have been very satisfactory. This year they were given out on a first-come, first-served basis on weekends. There were still long lines and the employees were working on their days off.

Permits are issued on a priority system. The order of priority is: 1) handicapped

people, 2) faculty and administrative personnel (excluding graduate students), 3) full-time employees, 4) part-time employees and 5) students (first-come, first-served).

This year Lots 5 and 6 were changed from Gold to Red lots. This stems from a decision made by the Parking, Security and Traffic Committee partially because students were using their spaces for storage and not moving their cars. More Red Lots were also needed.

As of Monday, Nov. 29,

parking meters have been installed in Red Lot 6. This was previously a faculty lot that was not fully used.

Chief Boulware encourages anyone who has an idea or constructive criticism that might im-

prove the parking system to write it down and give it to him. All helpful input is appreciated.

Nancy Winkler

New parking meters installed in Red Lot 6 across from Civil Building.

## New international policy

By HERALEEN SPRENGER

A new statement on the philosophy regarding international activities was endorsed by the University Cabinet at its Nov. 4 meeting.

It is supported by all the University of Missouri schools, and according to Dr. E.C. Bertnolli, "It is a melding of the existing four campus philosophy." Dr. Bertnolli is the director of the Center for International Programs and Studies at

UMR.

The statement is a result of work done by UM Vice President Melvin George and the provosts. It was based on papers submitted by each of the campuses.

In general, the philosophy recognizes that "knowledge transcends national boundaries" and that the UM has several related responsibilities. "The university, as a part of the worldwide community, has a responsibility to share its learning with other institutions. Since the university is responsible

to the state of Missouri and this nation for research that will improve the quality of life, it also has the obligation to absorb and use knowledge generated in other countries," it states.

see Policy  
page 4

## Wixson selected as campus rep

Dr. Bobby G. Wixson, acting provost, has been selected to represent UMR as campus representative on the Council of Sponsoring Institutions of Oak Ridge Associated Universities.

ORAU is an association of more than 50 colleges and universities. Its primary mission is to manage research, educational and training programs in energy, health and the environment for the U.S. Department of Energy and other sponsors. These opportunities are available to faculty and students across the nation.

Dr. Wixson is the link between the Rolla campus and ORAU. His role is to help UM faculty and students take advantage of thousands of dollars worth of fellowship or research opportunities at national laboratories and energy centers.

UM undergraduate students can spend a summer at a DOE national laboratory getting practical experience in their fields. Graduate students at UM can complete thesis or

dissertation research with funding from the Department of Energy. UM faculty can be awarded DOE funds to participate in ongoing research at DOE labs and make short-term visits to research facilities.

Special training in health physics and the use of radionuclides is available to UM student groups through ORAU's Professional Training Programs.

For application deadlines and more information about

these and other opportunities, write to the University Programs Division, Oak Ridge Associated Universities, P.O. Box 117, Oak Ridge, TN 37830, or contact Dr. Wixson.

## ROTC scholarships

SOURCE: OPI

More two- and three-year Army ROTC scholarships will be available for the 1983-84 academic year, with 40 percent designated for engineering and science students only, according to Lt. Col. Tom Bryson, professor of military science at UMR.

"The Army's need for officers educated in engineering and science exceeds the number currently entering active duty," Bryson said. "The number of available scholarships will increase dramatically this year, and, as an incentive to attract engineering and science students to military service, 40 percent will be awarded

only to engineering and science students. This is an excellent opportunity for these students to receive financial assistance."

ROTC scholarships pay for tuition, books, academic and activity fees and provide \$100 per month living allowance.

The two- and three-year scholarships are available to students in ROTC as well as to those not currently enrolled in ROTC. Applicants must be U.S. citizens and must be under 23 years old for two-year scholarships and under 22 years old for three-year scholarships (as of June 30, 1983).

"Many students worry about the four-year active

duty obligation that scholarship holders have upon graduation. But some of the most exciting jobs for beginning engineers today are in the military services," Bryson added. "Our graduates use their academic knowledge and gain invaluable management leadership experience sought by industry. After those four years of active duty, the young officer is even more valuable to industry."

Anyone wishing more information about Army ROTC scholarships should contact Capt. Dan Gifford at UMR's department of military science, Building T-2, or call 341-4740.

# CALENDAR OF EVENTS

**Editor's Note:** If your organization is having a meeting, turn in details to the MINER office in the Rolla Building before Monday at 9 p.m. and we will list it in the Activities Section of the paper. No articles submitted will be printed unless written in complete sentences with proper grammar. No schedule or flyers will be rewritten and published by the staff for the Activities Section.

If your organization is sponsoring a campus-wide event for the benefit of charity, get us details before Monday at 9:00 p.m. We will advertise the event free of charge in this space.

The MINER reserves the right to edit any notices or ads for this page before publication.

## THURSDAY

**HP-41C**  
The HP-41C User's Club of UMR will meet Thursday, Dec. 2, 1982 at 7 p.m. in Room 103 EE. Elections will be held.

**M-CLUB**  
M-Club meeting tonight at 7 p.m. in CE 114. We will conduct election at tonight's meeting and all members should attend.

**PHI ETA SIGMA**  
Phi Eta Sigma National Honor Society will hold its elections meeting Thursday, Dec. 2 (That's tonight!) at 7 p.m. in Room G-5 H-SS. Dean Adrian Daane will speak on graduate studies and graduate school. All activities are encouraged to attend and help make us a better organization. Refreshments will be served following the meeting.

**PI TAU SIGMA**  
Pi Tau Sigma will be having plaque signing tonight, Thursday, Dec. 2 at 6 p.m. in Room 216 of the ME Building. All actives are urged to attend.

**MSM**  
The MSM Climbing Club will hold its regular meeting tonight at 6:30 p.m., Room 207 Norwood Hall. The amendment to the constitution will be presented. T-shirts will be passed out (bring your money if you have not paid yet). Everyone is welcome.

**HKN**  
HKN will hold a general business meeting on Thursday, Dec. 2, in Room 105 EE at 6:30 p.m. Officers for next semester will be elected.

**NSBE**  
NSBE will hold its last meeting of the semester at 7 p.m. in the Missouri Room. Mr. Lawrence George will be the guest speaker.

**GDI**  
GDI will be having its last general membership meeting for this semester on Thursday, Dec. 2 at 7 p.m. in G-3 of the Chemistry Building. Refreshments afterwards.

**UMR FILM SERIES**  
UMR Film Series, "Burn," 7:30 p.m., Miles Auditorium, Mechanical Engineering Building. Season ticket or \$2.50 at the door.

**PHOTOGRAPHY CLUB**  
UMR Photography Club will hold a meeting Thursday, Dec. 2 at 7:30 p.m. in the Meramec Room of the University Center-East. There will be a photo contest for all members.

## TUESDAY

**COUNCIL OF GRADUATE STUDENTS**  
There will be a meeting of the Council of Graduate Students Tuesday, Dec. 7, at 8 p.m. in Room 208 of the ME Building. All graduate students are encouraged to attend.

## Spring Interviewing

If you plan to interview next semester at the Career Development office, a schedule of due dates for resumes and registration cards is printed below.

**Time Schedule:** First scheduled, Feb. 2, 1983.

1. Registration Card: May be completed anytime before Jan. 19, 1983. Registration is not complete until this is done. A new registration card should be detail sheet, Jan. 10, 1983; first day of classes, Jan. 13, 1983; first priority sign-up, Jan. 18, 1983; RESUMES DUE, Jan. 19, 1983; first regular sign-ups, Jan. 19, 1983, and first interviews

completed for the spring semester.

2. Resumes: a) Leave unused resumes in your file and update them with a new course list. You must also add your new GPA to the course list sheet.

OR  
b) Complete a new resume and file 20 copies in your Career Development office file.

3. Transcripts: You must complete a new transcript request form so the registrar will send a transcript which includes your fall semester grades. Designate 1 (one) copy be sent to the Career Development office.

## More grants available

Any veteran student who was originally scheduled to receive a Pell Grant but did not due to federal regulations should contact the Student Financial Aid Office at once.

Due to Congress' override

of the presidential veto this regulation (affecting veterans' Pell Grant) is no longer in effect and the Student Financial Aid Office wants to be sure no veteran is overlooked in re-reviewing these students' files.

## Missouri Miner

The Missouri Miner is the official publication of the students of the University of Missouri at Rolla. It is published weekly at Rolla, Missouri. The Missouri Miner features activities of the student and faculty of UMR.

The Story Of Scheherazade

## Dr. Yu named Curators' Prof.

SOURCE: OPI

Dr. Wei-Wen Yu, professor of civil engineering at UMR, was named a University of Missouri Curators' Professor at the meeting of the UM Board of Curators in Columbia.

The professorship is awarded to outstanding scholars with established reputations in their professions. Yu is the fourth UMR faculty member to receive the honor. Previous UMR recipients are Dr. Stig Friberg, chemistry; Dr. David Summers, mining engineering, and Dr. Delbert Day, ceramic engineering.

Yu is an internationally known authority in structural engineering, particularly in the field of cold-formed steel structures.

Yu joined the UMR faculty in 1968. A native of China, he received a B.S. in civil

engineering at National Taiwan University in 1950, an M.S. in civil engineering at Oklahoma State University in 1955, and a Ph.D. in structural engineering at Cornell University in 1960.

Before coming to UMR, he was research engineer and senior research engineer at the American Iron and Steel Institute, New York City, and staff engineer with TRW Systems, Redondo Beach, Calif.

In addition to teaching graduate and undergraduate courses in structural engineering at UMR, he has directed or participated in 11 research projects funded by grants totaling about \$430,000. Three major research projects are currently under way. These include a preliminary study of automotive structural components using high-strength steel sheets. He is

also revising a recommendation on load and resistance factor design of cold-formed steel and re-evaluating web crippling strength of cold-formed steel beams.

He is the author of "Cold-Formed Steel Structures," the first textbook in the field of thin-walled cold-formed steel structures, which is used throughout the world as a text and reference. He is also the author or co-author of several other technical books and of some 76 technical papers and presentations.

Yu has been the director of six international specialty conferences on cold-formed steel structures. He has also directed or lectured in seven short courses on cold-formed steel structures.

"Dr. Yu's research activity in structural engineering, particularly in

the field of cold-formed steel structures, has brought him national and international recognition," says Dr. Joseph H. Senne Jr., chairman of the UMR department of civil engineering. "His research findings have been used to improve design specifications issued by the American Iron and Steel Institute (AISI) and to prepare AISI technical publications. In addition, as a result of his research and efforts in continuing education, UMR is an internationally recognized center of excellence in the field of cold-formed steel structures."

The new Curators' Professor has been active in professional organizations, acting as a reviewer, a member of an editorial

board, and chairing and serving on several standards and specifications committees. These activities include past chairman of the American Society of Civil Engineers' Committee on

Cold-Formed Members, Council for Structural Connections, member of advisory committees and chairman of a subcommittee of the American Iron and Steel Institute.

Dr. Wei-Wen Yu named Curators' Professor at the meeting of the UM Board of Curators.

## Madrigal Dinners

SOURCE: OPI

The UMR Collegium Musicum will present the annual Madrigal Dinners at 6 p.m. Dec. 9, 10 and 11 in Centennial Hall, University Center-East on campus.

This year's theme is "An Elizabethan Entertainment." The decor and costumes of the performers will be centered around a general program of music from the Elizabethan period. A short Shakespearean excerpt appropriate to the music will precede each selection.

The selections, in turn, will be presented by the various ensemble groupings (both vocal and instrumental) of the Collegium Musicum.

The menu this year includes prime rib, tossed salad, twice-baked potato, broccoli, tomato parmesan, hot rolls, vanilla ice cream with strawberry topping, tea and coffee.

The pre-dinner reception begins at 6 p.m. A "wassail" ceremony signals the beginning of the formal program at 6:30 p.m. and dinner will be served at 7 p.m. Entertainment will be continuous throughout the evening.

"The music is that which was performed during the Elizabethan era," says Joel Kramme, UMR assistant professor of music and producer/director of the Madrigal Dinners. "The program is supported by

private gifts and funds donated for the UMR Madrigal Dinners and Choral Development."

The price of the dinner and evening's entertainment is \$10 per person. Fliers with detachable reservation forms will be available within the next week at Rolla area banks and at the university's Cedar Street Center, Books 'N' Things, Logos Bookstore, Reader's Alley, or at the music office, 105 Harris Hall, on campus.

Reservations may be made by mail only and must be accompanied by payment for the full amount.

see Madrigal  
page 4

## Christmas music

SOURCE: OPI

The UMR Choir and Orchestra will present a concert of Christmas music at 2 p.m. Sunday, Dec. 5, in the First Baptist Church, Ninth and Cedar streets, Rolla. The public is invited to attend and there is no admission charge.

The choir of 47 voices and 42-member orchestra are directed by Joel Kramme, assistant professor of music at UMR.

According to Kramme, "Included in the program are three Christmas hymns, by Michael Praetorius, found originally in two early publications of Protestant hymn books (1600s)." They are "The Son of God a Child is Born," "En Natus Est Emmanuel" and "The Fruitful Seed of Jesse." Three movements from "In Nativitate Domini" by William Byrd will also be performed. These are "Hodie Christus Natus Est," "O Magnum Mysterium,"

and "Beata Virgo" (O Blessed Virgin).

These selections will be followed by "Magnificat" by Giovanni Battista Pergolesi and "Carol Fantasy" by Norman Lockwood. "Carol Fantasy" includes "Deck the Halls," "We Three Kings," "Away in a Manger," "O Tannenbaum" and "When the Winter Sun."

The University Choir and Orchestra will perform again that evening at Fort Leonard Wood.

## ACT forms

Financial aid forms (the ACT Family Financial Statement) for the 1983-84 academic year are not expected to be available until

after Jan. 15, 1983. When they do become available you may receive them in the hall outside the Student Financial Aid Office.

## CIA spying

**SOURCE: CPS**  
 WASHINGTON, D.C. — The Central Intelligence Agency (CIA) no longer has to tell if it has recruited at or spied on college campuses, a federal appeals court has ruled.

The appeals court in Washington, D.C., last week said the CIA didn't have to turn over documents requested under the Freedom of Information Act (FOIA) by University of California student Nathan Cardels, who was trying to discover if the CIA had been recruiting foreign students at UC.

The three-judge court ruled the CIA would undermine its own effectiveness if it was forced to

let Cardels see certain documents, and "the work of foreign intelligence agencies would be made much easier" on U.S. campuses.

Since most FOIA lawsuits are heard in Washington, D.C., the ruling affects some 125 campus FOIA requests to find out about CIA recruiting on campus, its debriefing of traveling professors and students, and its alleged spying on foreign students, says Susan Schaffer, the American Civil Liberties Union lawyer who presented Cardels' case.

The U.S. Student Association has also sued the CIA to release documents relating to the agency's surveillance of the student group. The case is pending.

Classifieds are offered free of charge as a service and source of entertainment to the readers.

•The MINER will not print the combination of first and last names.

•The MINER will print phone numbers only in business-related ads.

The MISSOURI MINER reserves the right to edit or to refuse publication of any classifieds that its staff finds offensive or libelous.

Classifieds should be submitted by 9 p.m. the Monday before the issue in which it is to appear.

## International policy

from page 1

Participating in carefully selected international activities is another responsibility it names. Such activities include those which contribute to education of its students or broaden the UM's research capabilities.

More specifically, the activities should result in opportunities 1) for study abroad programs, 2) for faculty to extend the impact of their research and teaching beyond the campus, 3) for foreign students

to enrich the intellectual and cultural life of the UM, and 4) to support development of educational institutions in other countries.

Dr. Bertnolli claims that the statement is a step in the right direction. He ex-

plained, "We need an international philosophy to help UMR, the University of Missouri, Missouri and the nation to evolve in the international world of the future."

## EVEN STRAIGHT A'S CAN'T HELP IF YOU FLUNK TUITION.

Today, the toughest thing about going to college is finding the money to pay for it. But Army ROTC can help — two ways!

First, you can apply for an Army ROTC scholarship. It covers tuition, books, and supplies, and pays you up to \$1,000 each school year it's in effect.

But even if you're not a scholarship recipient, ROTC can still help with financial assistance — up to \$1,000 a year for your last two years in the program.

For more information, contact your Professor of Military Science.

## Grade Appeals

# Council approves changes

By HEIDI FLUEGEL

There will be several changes concerning UMR. Several changes directly involve the students and departments.

Two items which went before the Academic Council, and were passed, were the grade appeal procedure and the time concerning the period of appeal.

The grade appeal procedure has been changed to the following. The changes are italicized.

### GRADE APPEAL PROCEDURE

Source: 1982-83 Manual of Information, pp. 63-64.

Approved changes are in italics.

A. The grade appeal procedure is available only for review of alleged capricious grading, and not for review of the judgment of instructors in assessing the quality of students' work, or for questioning the state grading criteria selected by the instructor. Only a student who alleges he or she

was subjected to capricious grading may use the grade appeal procedure.

B. Capricious grading, as that term is used here, consists only of the following:

1. The assignment of a semester grade to a particular student on some basis other than those related to academic performance in the section;

2. The assignment of a semester grade to a particular student by more exacting or demanding criteria than were applied to other students in the same section. (NOTE: Additional and/or different grading criteria may be applied to graduate students enrolled for credit in a course numbered below the 400 level);

3. The assignment of a semester grade by criteria that represent a substantial departure from the instructor's previously announced criteria.

C. The grade appeal procedure shall consist of the following steps:

1. The initial step in the grade appeal procedure shall be for the student to review with the section instructor the semester grade, the stated grading criteria, and how the stated grading criteria were applied to determine the student's semester grade. This step must be initiated within 30 days after the first class day of the succeeding regular academic semester. *If the student and the instructor fail to reach a mutually satisfactory decision during this discussion, then the student may proceed to step*

2. *The student shall contact the chairperson of the instructor's department and request that he or she serve as a mediator during a discussion between the student and the instructor. If the student and the instructor fail to reach a mutually satisfactory decision during this discussion, then the student may proceed to step 3.* The student shall inform the Dean of Students at this

point that an *grade appeal process is in progress.* The student shall request, in writing, that the department chairperson inform the instructor and convene an ad hoc review group composed chairperson (or *designated representative*) of the *instructor's department, and the dean (or the dean's designated representative)* of the instructor's school or college, *and a third member to be appointed by this dean from his or her faculty.* The student and the instructor shall be allowed to appear before the ad hoc review group. The decision reached by the ad hoc review group on the question of alleged capricious grading shall be binding and final on both the student and the instructor.

D. If capricious grading is substantiated by the ad hoc review group, the student shall be assigned a grade

### The spirited UMR

By PAT  
VAN RYCKEGHEM

Although professional football is just getting under way again after the strike, college football is over for the year. It means the end of a long season and many hours of practice for the players. It is also the end of many long hours of practice for the UMR cheerleaders. Though it is true that not as much emphasis is placed on sports at an engineering school as compared with other schools, there are some students here who think that sports, and in particular, school spirit, is very important. So important that they devote a good part of their free time to it. At some schools, partial

and even full-ride scholarships are given out for cheerleading. Our cheerleading squad is sponsored by Student Council and the members of the squad receive no scholarships, and not nearly the support which they deserve. Most of the squad were cheerleaders in high school and say it is worth all the hours spent practicing. Congratulations to this year's cheerleaders for a job well done. They are, in alphabetical order:

Roger Coxon, captain, a junior in aerospace engineering from St. Louis;

Darla Birdsong, a junior in engineering management, from Poplar Bluff; Will Emory, a freshman in Geophysics, from

Milwaukee, Wis.; Eileen Glynn, a junior in geological engineering, from St. Louis; Lori Harlan, a junior in mining engineering, from Joplin; Rod Hilburn, a junior in electrical engineering, from Raytown; Steve Kane, a freshman in computer science, from Tucson, Ariz.; Janet Landers, a sophomore in computer science, from Devils Elbow; Kim Molner, a junior in engineering management, from Ellisville; Greg Monroig, a junior in chemical engineering, from Washington, Mo.; Colin Ohler, a freshman in aerospace engineering, from Kansas City, Mo., and Ellen Tierney, a senior in engineering management, from Sullivan.

## The rising cost of

# Textbooks

By ROB LIPPERT

As the end of the semester approaches, many students are faced with the question of what to do with that dreaded history or philosophy book. Well, there are two options open to students. You can keep it as a treasured keepsake of that class, or you can resell it to one of the two bookstores.

Most of the time, one of the bookstores is more than willing to accept a used book back. Provided, that is, that the book is in usable condition, and that the text will be used in the coming semester. According to University Bookstore Manager Dan Klingenberg, the going rate for a returned book is 50 percent of the book's original retail price.

After the book is bought from a student, the book is cleaned up and rebound if necessary (the cost of this, right now, is about \$3 per book). The book is then marked up to 75 percent of its original value, and sold to UMR students or to a used-text book wholesaler, where it is distributed to other colleges and universities.

Used-book sales account for about 25 percent of the bookstore's total book sales. Used books, however, account for most of the profits made on all book sales. The bookstore, according to Klingenberg, after paying the expenses of shipping the book and paying other overhead on the book, barely breaks even, and often even loses money on the sale of a new book.

Even though the bookstore does make a profit on its used-book sales, its greatest profits are made on novelty items, such as T-shirts, and other items with the school's logo on them, and on school supplies. The bookstore is generally 10 percent higher than area discount stores on most school supplies. One item, for example, Pentel lead HB, costs 68 cents at Wal-Mart discount stores. At the University Bookstore, the same lead, the same amount, costs 80 cents. Looseleaf paper, notebooks and Bic pens are also considerably more.

Another question that is in students' minds is "How much are books going to set me back for next semester?" The answer is not much more than they did this semester. According to Klingenberg, book prices shouldn't fluctuate much for the spring '83 semester. The greatest fluctuations occur during the summer, when book prices change almost unpredictably. Klingenberg has no idea at this time as to approximate prices for next fall. Prices depend on the publishers and what their prices are at that particular time.

As for getting rid of books from this semester though, students should have relatively little trouble unloading the most hated "survey course" books on the bookstore and actually getting some money out of them as well as that much cherished economics or psychology education that they received from them.

## Change from page 5

the board created separate departments of psychology, philosophy, life sciences, history and political science, English, economics and applied arts and cultural studies. The department of applied arts and cultural studies would include the

music/art/theater program, speech and media studies, anthropology/sociology and foreign languages. The departmental changes will take effect on July 1, 1983. These changes are not expected to create any new administrative costs.

# ENGINEERING TAKES ON EXCITING NEW DIMENSIONS IN THE AIR FORCE.

Computer-generated design for investigating structural strengths and weaknesses.

astronautical, civil, electrical, mechanical and nuclear. Hundreds of diverse specialties are included in a wide variety of work settings. For example, an electrical engineer may work in aircraft design, space systems, power production, communications or research. A mechanical engineer might be involved in aircraft structure design, space vehicle launch pad construction, or research.

## OPPORTUNITIES IN THE NEW USAF SPACE COMMAND

Artist's concept of the DSCS III Defense Satellite Communications System satellite. (USAF photo)

Recently, the Air Force formed a new Space Command. Its role is to pull together space operations and research and development efforts, focusing on the unique technological needs of space systems. This can be your opportunity to join the team that develops superior space systems as the Air Force moves into the twenty-first century.

To learn more about how you can be part of the team, see your Air Force recruiter or call our Engineer Hotline toll free 1-800-531-5826 (in Texas call 1-800-292-5366). There's no obligation.

## AIM HIGH AIR FORCE

## PROJECT RESPONSIBILITY COMES EARLY IN THE AIR FORCE

Air Force mechanical engineer inspecting aircraft jet engine turbine.

Most Air Force engineers have complete project responsibility early in their careers. For example, a first lieutenant directed work on a new airborne electronic system to pinpoint radiating targets. Another engineer tested the jet engines for advanced tanker and cargo aircraft.

Developing and managing Air Force engineering projects could be the most important, exciting challenge of your life. The projects extend to virtually every engineering frontier.

## 8 CAREER FIELDS FOR ENGINEERS

Air Force electrical engineer studying aircraft electrical power supply system.

Engineering opportunities in the Air Force include these eight career areas: astronautical, aerospace, architectural,

# 'Dear Santa...'

By C-SPACE AND GRIMICE

Dear Santa Claus,

How have you been? How has Mrs. Claus been? I've heard she was pretty good. If not, you've still got eight reindeer (tiny ones at that). I heard some pretty interesting reasons as to why Rudolph's nose lights up. (Some of the better ones were in my abnormal psychology class.)

We have been very, very good boys this year (as long as you didn't watch too close ...), so we know you'll be sympathetic to our position. The list is longer this year, but you of all people should know that since our tuition has gone up, we can't afford to indulge our every whim and fancy as we used to. We feel the following items will

help us to forget that we just went from "poor" to "even poorer college student" status.

Let us begin with the simple bare necessities of life:

1) Three or four sure fire opening lines for meeting women.

2) More women to meet.

3) Better places in which to meet women.

4) A grant in the form of credit (a tab) at No. 3 with which to study the effects of No. 1 on No. 2 above.

Now that we have the essentials out of the way, let's move on to the finer things in life:

A toboggan for the toboggan run in front of Parker Hall would be nice, along with 50 shares of preferred stock in Auxiliary Enterprises (one of the few

businesses that's actually turning a buck.) How about a fabric softener that controls static cling that can be added to the wash? or a heated toilet seat for those cold winter mornings?

And to show that we're not entirely selfish, Santa, here's a request from us for the Ayatollah Khomeini. Send him a case of Extra-Strength Tylenol capsules for those headaches we're sure he's getting from running his Islamic Revolution.

Thanks a lot for listening, Santa. To help show our appreciation for all you've done, Mike and I would like to give you something in return — one free request to be played on KMNR next time you're in Rolla. It's the least we could do.

P.S. What kind of cookies do you like?

Ken Donnelly

Do you know where on campus this photo was taken? See Page 17 for the answer.

## St. Pat's Facts

By MIKE SIMMS

There are only 105 days left until the 75th Annual St. Pat's Celebration, it's time to get psyched. Christmas is rapidly approaching. What could make a better or more economical Christmas gift than St. Pat's green? All of this year's "green" items are in. The price list is as follows:

Sweatshirts	
Green	\$8.50
White	\$9.50
Children's	\$7.50
Pitchers	\$6.50
Huggers	\$3.00

Goblets	\$3.00
Tumblers	\$2.00
Garters	\$1.00
Buttons	\$.50
Visors	\$3.25
Derbies	\$3.00
Ball Hats	\$3.50
Stocking Caps	\$3.50
Coasters	\$3.00
Paper Weight	\$4.00

Help make St. Pat's 1983 the Best Ever by buying lots of green.

If you haven't noticed, the new special edition 75th anniversary white sweat-shirts are on campus now. This is going to be the only year these special edition

sweatshirts will be available, so be sure to get yours now.

The St. Pat's coupon found in this edition of the Miner can be used the rest of the semester. Any coupon redeemed at the campus sales table will count toward your organization's green points. There is no reason not to use your St. Pat's coupon and save.

Do you realize!!

UMR's St. Pat's celebration is older than — The Model-T Ford, Mickey Mouse and, believe it or not, MTV.

## Attention December Graduates Only Free Copy of "Go Hire Yourself an Employer"

This is a great book because it tells you how to tap the hidden job market. 80% of the jobs are never advertised. They are in The Hidden Job Market.

It stresses what you, the individual, can do for the employer rather than what the employer is going to do for you. The methods outlined in GO HIRE YOURSELF AN EMPLOYER take you past bureaucratic personnel departments to the level where you want to work. You'll learn the art of interviewing for information, and through it find judgment jobs—jobs you won't see advertised in the Help-Wanted ads. Read this and then GO HIRE YOURSELF AN EMPLOYER.

Whether you now have a job or not, this book will be valuable for your career advancement.

Gas companies can't wait to send you their credit cards. Local stores invite you to drop in and look around. Your mailbox is stuffed with offers, promises and congratulations.

You're a hot commodity. You're a potential big earner. That's why everyone wants to sign you up now.

And you may as well enjoy this special attention while you can. Because it won't last.

Your sudden popularity will vanish as quickly as it came.

From then on, no one will be handing you anything. From then on, you work things out for yourself. And one of those things is life insurance.

Fidelity Union Life has a plan designed for you. Our Field Associates (average age: 28) are specially trained to handle your unique needs. And more college seniors have started with the Fidelity Union Life Plan than with any other company.

These basic guarantees are yours if you can qualify. (You must be a US citizen or resident alien. As a student you qualify on a special basis, you cannot qualify on the same basis after you graduate.)

1. Guarantees security for loans.
2. Guarantees cash for emergencies.
3. Guarantees cash for investment opportunities.
4. Guarantees you will be able to buy life insurance in the future, no matter what.
5. Guarantees retirement income for life, cash cannot "run out."
6. Guarantees immediate estate in case of death.
7. Guarantees cash continues to increase in case of disability.
8. Guarantees minimum \$135,000 cash at age 65 in case of disability with all deposits made for you.
9. Guarantees to at least double your estate in case of accidental death.
10. Guarantees at least a \$350,000 estate paid-up in case of disability.

We are America's number ONE financial plan for college educated young adults. There can be no deposits until quite some time after you start work.

Get in touch with us today by returning the coupon below or calling.

Just fill out the coupon, return it to us and we will deliver your gift, along with complete details about programs tailored to your personal needs. I certify that I am a December Graduate. (Must mail by Dec. 6 to qualify.)

# Qualities needed for success

By BARB THOMAS

As the semester comes to a close and, for some lucky ones, school comes to an end, career goals and attributes that influence success are becoming more important. In a recent issue of the Technical Idea Exchange magazine, an article was presented on the two previous topics. The sections I have included here are those that can benefit all future engineers.

First, your career goals should be long-range goals that have importance to you. They should reflect what you

really want to do, rather than a given position or title. You need goals as targets to shoot for. But, at the same time, you should keep your plans flexible because you and your values change with time.

Although your goals have to be tailored for you, you can gain some insight by observing others who have already reached the goals you have in mind. You can perhaps determine the factors that seem to be their strong points and the ones that helped them get where they are. Thus, you can evaluate whether your goals

are realistic and are consistent with your aspirations. You can also assess the requirements needed to meet them.

In addition to career goals, you also need attributes that can be an influence to your success. Some of these attributes are your technical capability, your desire to succeed, hard work, self-confidence, dependability and consistency, good judgment, enthusiasm, your communicative ability, intestinal fortitude and a sense of humor.

Your technical capability goes almost without saying.

It is the very base of your engineering career. You need an area of expertise to make you stand out. Since technology is expanding in every area, this requires continuing study on your part, along with the experience on the job.

A desire to succeed is one quality that is universal for anyone who moves up. This desire can compensate for a deficiency in almost any other area. An individual who might be a little short on ability but who is properly motivated by the desire to succeed will put in the extra effort to get the required results.

Hard work is another necessity for success. Success is predicated on your willingness to work hard. It has been said that "many fail to recognize opportunity because its favorite disguise is hard work."

Self-confidence is also important. You have to

develop confidence in yourself and your ability. You have to know you've got it before anyone else will recognize it.

Being dependable and consistent are two qualities that management always looks for. They want a person who always achieves the expected results or better.

Good judgment is another prime quality, but is more elusive and harder to define because it encompasses so many others. Two especially important ingredients are intellectual honesty and decisiveness.

Another important attribute is enthusiasm. All managers like to work with engineers who are enthusiastic. Enthusiasm is an attitude that you should develop. It is vital!

Another area that is very important, but is usually slighted in our academic training as engineers, is our ability to communicate.

Learn how to get your point across. One of our biggest problems today is in communication. Many people have a hard time getting reports and technical papers written. This is where you can get a definite edge on your competition.

Intestinal fortitude is a definite necessity in any job. Intestinal fortitude is having the guts to hang in there with the stamina to see it through and to cope with some discouragement along the way.

Finally, one must always have a sense of humor. Don't take yourself too seriously, that is, develop a healthy sense of humor. This doesn't mean being a perpetual clown, but cultivate an agreeable frame of mind that makes others enjoy your conversation. It's a good antidote for stress and it is good for your blood pressure and for the morale of your group to be able to laugh now and then.

Mark Vollmer

Second City performers were in Rolla Nov. 18 for a night of fun and entertainment. A large crowd filled Centennial Hall and the company was well worth it.

Big bucks for

## Chow down

By MIKE SIMMS

The week of Nov. 1-4 served as the dates for this semester's Theta Tau Omega Pizza Night. The week proved to be the best ever since Pizza Nights were started some 11 years ago. A total of \$779 was raised by Theta Tau in cooperation with Pizza Inn. This money will be combined with next semester's Pizza Night earnings and the total donated to a local Rolla charity.

The top contributors were:

Tech Engine	\$120
Sigma Nu	72
TKE	72
Pi Kappa Alpha	67
Phi Kappa Theta	47
RHA	27
Kappa Sigma	26
Sigma Phi Epsilon	25
TJ	25

Zeta Tau Alpha 23  
Beta Sigma Psi 23  
Chi Omega 20

On behalf of Theta Tau,  
Pizza Night Chairman Joe

Lambing would like to express his thanks to not only these organizations but everyone who helped make this Pizza Night the best ever.

## Party Line

The Missouri Miner will print free of charge any party announcement for campus organizations which are submitted before 9:00 p.m. Monday at the Miner box in the Rolla Building. Announcements should be submitted a week before. Hand in announcement in paragraph form with complete sentences (Read: no flyers). We cannot print prices for alcoholic beverages.

### DELTA SIG'S END OF THE WORLD PARTY

Delta Sigma Phi will hold one last FUTILE and INSANE act before finals' week begins. The "End of the World" party will occur Thursday, Dec. 9, from 8 p.m.-1 a.m. at Three Fraternity Drive. Plenty of refreshments for everyone.

# Jeanne Dixon rumor unfounded

SOURCE: CPS

BOSTON, MA — Some- where in the dark of Halloween night, a mass murderer was to have snuck into a women's dorm at Holy Cross, and destroyed several of the residents.

He was also to have been committing mass murders at St. Bonaventure, Niagara University, Villanova, Providence College, Stonehill College and just about any other eastern Catholic college with a women's dorm.

The mass murder that never was turned out to be just this year's version of the seemingly-annual Jeanne Dixon rumor.

As has happened at least once during each of the last four school years, a rumor began circulating that syndicated psychic Jeanne Dixon had vaguely predicted a mass murder of women students on a certain type of campus in certain dorms that had certain characteristics.

And, as has happened in all the previous years, after

a spate of publicity and even some panic, a Dixon spokeswoman denies there was ever any such prediction.

Asked how such rumors begin, Julie Burdette, Dixon's secretary, speculated, "I guess people get a kick out of doing that sort of thing. It's publicity. (Dixon) is probably right nine times out of 10, and this is why they pick her."

Burdette says the only call she got on this year's rumor, which had the mass murder happening in a women's

dorm on a "small, eastern Catholic college," was from a terrified Virginia woman who had a daughter at one of the schools.

Reaction at the schools themselves was considerably more widespread. Security directors at Villanova, Providence College and St. Bonaventure reportedly kept extra officers on duty on Halloween, to guard as much against panic as against the phantom.

The prediction, according to rumor, originally was made by Dixon on the "Merv Griffin Show," or printed in the National Enquirer and the Syracuse Post Standard.

But Dixon has not been on the Griffin show for years, a Griffin spokeswoman says. The Enquirer dropped Dixon's column years ago, and the Post Standard could find no such Dixon column in its files.

In 1981, a supposed Dixon prediction had residents of

Arizona State's Manzanita Hall exhibiting what one security officer called "hysteria."

The year before, a rumor had the psychic predicting a murder on the "top floor of the largest women's dormitory in the largest dormitory complex in the country," and caused considerable fear at Penn State's Brumbaugh Hall.

Ball State University and Western Maryland College were named in similar "predictions" in 1979.

## Brass quintet

By JANET JANSEN

With 50 concerts over a four-month period in the United States alone, with their first tour of the Orient and their 12th consecutive tour of Europe, the Annapolis Brass Quintet is indeed an active performing group. The versatile ensemble performs in places from the world's concert halls before audiences of thousands to village greens in towns of 200 inhabitants to Rolla, Mo.

Tuesday, Dec. 7, the Annapolis Brass Quintet will be appearing in the Cedar Street Center at 8 p.m. The program titled "The Spirit of Christmas Brassed" is also the name of their 1977 released album.

Members of the Annapolis Brass Quintet say the horn, trombone, tuba and trumpet are the best instruments for expressing Christmas carols. For 10 years, they have been putting those words into practice by

performing classical and contemporary Christmas pieces for their audiences. The concert will include a traditional English and Spanish carol medley and selections from the Italian Renaissance, such as "The Twelve Days of Christmas" and "O Come, O Come Emanuel." Welcome the Christmas celebrations with a concert, Tuesday. The Fine Arts Committee of the Student Union Board is presenting the ensemble and admission is free.

## Miserable squad

By MIKE STRODER

Hello and good day. Today, it is my privilege to conduct a rare interview — with a man whose very job defies definition. This is "Mr. X" — captain of the "Miserable Squad." First, Mr. X, just what is the "Miserable Squad?"

"Well Mike, we are best described by example. Everyone has had one of those wretched days where they wish they had never gotten out of bed. Your test

was at 8:30, but you could have sworn it was at 9:30; all of your bills arrive simultaneously; the neighbor's German shepherd has just eaten your cat; 999 out of your 1,000 job applications come back with rejections, etc. Well, our job is to coordinate these miserable days so as much that can go wrong, will."

"Sort of like the enforcers of Murphy's Law, in other words?"

"Exactly! See, the class

paranoid was right .. there really is somebody out to get you."

"You are employed by the university, aren't you?"

"Yes. Our squad was developed several years ago to try to 'prepare our students for the real world,' if you will."

# Study abroad

Scandinavian Seminar is now accepting applications for its 1983-84 academic year abroad in Denmark, Finland, Norway, or Sweden. This unique learning experience is designed for college students, graduates and other adults who want to study in a Scandinavian country, becoming part of another culture and learning its language. One-semester programs, only in Denmark, are also now available.

After orientation in Denmark and a two to three week intensive language course, generally followed by a family stay, students are placed individually at Scandinavian Folk Schools or other specialized institutions, where they live and study with Scandinavians of diverse backgrounds. The Folk

Schools are small, residential educational communities intended mainly for young adults. Both historically and socially, these colleges have played an important part in the development of the Scandinavian countries. Midway through the folk school year, all the seminar students and staff meet in the mountains of Norway to discuss progress and make plans for the spring. A final session is held at the end of the year to evaluate the year's studies and experiences. Because the Scandinavian countries are small, open and accessible, the year provides an unusually rich opportunity for the student to explore his or her particular field of interest by doing an independent study project.

American academic credit for participation in the

seminar program has been awarded by more than 150 American colleges and universities upon recommendation of the seminar staff. However, students who require an academic transcript may qualify to receive one through the International Programs Office of the University of Massachusetts.

The 1983-84 fee, covering tuition, room, board and all program-related travel in Scandinavia, is \$6,200. Applicants may apply for supplementary interest-free loans and grants, awarded on the basis of need and qualification. The application deadline is March 1, 1983.

For further information, please write to: SCANDINAVIAN SEMINAR, 358 N. Pleasant St., Amherst, MA 01002.

Students enjoy the unusually warm November weather.

Nancy Winkler

## Squad

from page 9

"Your tactics are not just limited to those miserable days, are they?"

"No, we try to keep a daily effort. We sponsor many things that go unnoticed by most. We work with professors to try to schedule every possible test into a two-day period. We also have ringers in every class."

"Ringers?"

"Yes. Ever notice the inevitable guy in every class who ruins the curve? Or our squad that always sits in the front and asks stupid

questions?"

"Your agents?"

"Yes. We're also in charge of climate control in the buildings across campus. We're the reason why students have to wear heavy coats in some classrooms when the atmosphere in the Humanities-Social Science Building resembles that of a bamboo steamer, regardless of outside temperature."

"Fascinating. Do you have any other tactics that you are especially proud of?"

"Well, we're proud of our Rayl Dining Hall squad and

our Parker Hall team. These two have inflicted more misery ... oh, I've let the time go. Excuse me, but I have a meeting to sabotage."

"Thank you, Mr. X. It has been informative. Good day to all and just remember — there really is somebody out to get you!"

# Job outlook is 'bleak and scary'

SOURCE: CPS

ITHACA, N.Y. — "It really looks bleak and scary," says Dawn Levine, a senior at Cornell. "I live with six other girls, and our parents are always sending us articles" about how still the job market is these days.

All of them — Levine, her roommates, their parents — aren't moaning without cause. This year's college grads are chasing the fewest job prospects any college class has had for decades, a variety of observers say.

There will be fewer jobs this year than last for engineering, business and liberal arts grads, according to the College Placement Council (CPC), a trade group of campus employment counselors.

Michigan State's annual survey of some 600 employers found businesses will probably hire 17 percent fewer grads than they did last year.

And while they say they'll be paying the average new employee 2.8 percent more than they gave those from the Class of '82, "the real dollars earned by the Class of '83 will be less than the Class of '82," says John Shingleton, MSU's placement director.

Northwestern's annual Endicott Report is not yet ready for publication, but NU counselor Victor Lindquist says the student job market is the worst it's been "in 25 years."

The CPC's Judith O'Flynn Kayser says she hasn't seen this kind of tightening in the job market since 1975, in the wake of the Arab oil embargo.

There aren't many bright spots. Federal government hiring — traditionally a major consumer of liberal arts grads — "is flatter than a pancake," Shingleton says.

The CPC found a 12 percent drop in demand for engineers, and a 4 percent drop in demand for business majors.

Northwestern's Lindquist notes, "the industries that are remaining strong (in recruiting college grads) are beneficiaries of defense contracts," particularly companies dealing in "militarized electronics."

But some "militarized" companies don't agree. "Projections for high tech (hiring on campus) appear to be pretty flat," says Rod

Hanks, manager of salaried personnel at Lockheed in Burbank, Calif.

"My requirements are down 25 percent," adds John Kubeyka, employment manager of Sperry-Univac in Blue Bell, Pa. "I don't anticipate any change."

Gail Marshall of United Technologies' personnel office says decentralization makes it hard to gauge her firm's recruiting efforts this year, but she does volunteer that "it is definitely not a good time to be a graduate out on the street looking for a job."

"I have seen increases in two areas: the number of students walking into the office and their level of anxiety," says Thomas Devlin, Cornell's placement director.

Student traffic at placement centers around the country does seem to be up this year. A fifth of Los Angeles City College's student body has used the school's placement office since September, says Student Personnel Office Coordinator Jose Ruiz.

There are also more students at St. Louis University's placement office, where counselor Dr. Susan Dayringer notices "an interesting change in the type of person we are seeing. About 25 percent are alumni."

Her office has helped people who graduated 20- to 30 years ago, she says.

Currently-enrolled students, moreover, are coming in with lowered expectations.

Students last year came in concerned with salaries, says University of South Carolina Director of Student Services Len Maiden. "Now the interest is whether there is a job out there."

Cornell student Levine, who works at her campus placement office, recalls last year's engineering students bragging about the number of job offers they'd gotten even before beginning the formal interviewing process.

"Now they come in discouraged."

There are exceptions. A recruiter at two-year Georgia Southwestern College had trouble finding students to interview during a recruiting visit the week before Thanksgiving, complains a college administrator.

The administrator, who

asked not to be named, expects "some students may go to the Houston and Dallas area" to look for work when the term is over.

Cornell students are "saying I would go anywhere," Levine reports. Insisting on finding a job in-state last year, now they're willing to go to "Washington, California, the cities in the West."

About the only "confident" Cornellians are computer science majors, she says.

Indeed, most counselors do think computer science majors are among the more fortunate grads this year. The only area the CPC predicted an increase in hiring was in science, math and technical jobs.

"The industries that are showing the best opportunities," Michigan State's Shingleton says, "are the hospitality and computer industries."

"Accounting will hold up pretty well," he also predicts.

"This is a great time for math and science majors," concurs South Carolina's Maiden.

At the State University of New York-Albany, computer science is the lone bright spot, says Mary Ellen Stewart, career planning director.

Even amid the gloom, Shingleton advises, "Keep in mind that most college graduates will have jobs by graduation time." He predicts 17 percent of this

year's seniors will fail to get jobs by the time they graduate, compared to an average of 13- to 16 percent over the last five years.

For those who remain unemployed, even that last refuge — grad school — is more inaccessible.

"Some of my friends are discouraged about going to graduate school," Levine says, because they're unsure about getting financial aid and their ability to repay it if the job market doesn't improve.

Following is a list of companies that will be recruiting during the Spring 1983 recruiting season. List subject to change.

## Social security

# Must be dealt with

By DR. GEORGE

S. BENSON

In a recent article, the eminent economist, Dr. Hans Sennholz, wrote:

"Let us assume that a married person who regularly paid his payroll taxes since the initiation of the Social Security System retired after 20 years of coverage, on Jan. 1, 1957.

"Let us also assume that he contributed the maximum payable under the law. From 1937 through 1949, he contributed 1 percent on \$3,000 annual income, \$30 per year, or a total of \$390 in 13 years.

"In 1950, he paid 1½ percent on \$3,000 or \$45. From 1951 through 1953, his payment amounted to 1½ percent on \$3,600 or \$162. In 1954, the payment was 2 percent on \$4,200 or a total of \$168. Altogether he paid no more than \$837 during the first 20 years of coverage. If we add an equal amount of 'employer contribution,' which actually came out of his pay, his total contribution to the System

amounted to \$1,674.

"In 1957, this payment entitled a retiring couple to receive \$162.80 in monthly benefits, which since then have been raised to \$516 per month. In other words, in 1957 they received in 10 months and eight days the equivalent of their total contributions. His life expectancy, however, amounted to approximately 13 years, hers to 18 years. If they are still alive today, 23 years later, they are collecting every three months and eight days what they paid in since the beginning. Their total benefits have exceeded \$50,000 on total contributions of \$1,674 or 30 times more than they paid in."

If this doesn't illustrate an inequity, what would? If this doesn't make clear why the Society Security program is in economic straits, what would?

To present the facts on a current basis, consider this comment from Congressman Latta of Ohio:

"A worker retiring at age 65 in 1982 who has paid the maximum tax on the

maximum earnings allowable under the law will have paid \$14,766 into the trust fund. This person will receive \$8,148 annually in monthly payments of \$679 during his or her retirement for benefits of future retirees plus all subsequent increases provided by law. A nonworking spouse of this worker will also be eligible for an additional 50 percent in retirement benefits at age 65 notwithstanding the fact that no contributions were made by said spouse into this account number.

"The actuaries say a worker retiring today can expect to live an average of 15 years, thereby drawing a minimum of \$122,220 in Social Security benefits...."

American business authority Peter Drucker has pointed out that the claims can be satisfied only out of future production. The people who work must produce a surplus of goods and services and then be willing to hand that over for the benefit of the retirees. When the increased income of the worker equals only half of what he must pay out for benefit payments will

those earning be willing to pay the estimated 40 percent payroll tax necessary to fund these benefits? This is a question which must be faced now, not later when they might have much more serious complications.

## Hot Miners off to 4-1 record

By SCOTT WHITE

While turkey and dressing hung heavy in the stomachs of many Missourians, the UMR Miners completed the first five games of the 1982-83 season. Getting off to one of their best starts in years, the Miners' record now stands at 4-1.

The cagers opened against Missouri Valley on Nov. 19 at Rolla. On the strength of 56 percent field goal shooting the Miners opened up a 40-30 halftime lead and were never seriously challenged as they took an 87-76 decision over the Vikings. Curtis Gibson led the way for UMR with 22 points followed by Rickie Cannon with 16, Todd Wentz with 14 and Joey McDowell with 13. Ken Dinsdale and Stan Shuemaker combined for 10 points and seven assists off the bench. Opportunities to break the game wide open eluded the Miners as they had their problems containing the forward duo of Bowan and Logan of the

Vikings who combined for 38 total points.

Nov. 20th found UMR in St. Louis to take on Washington University. Once again the Miners had the hot hand in the field goal department canning 33 of 65 for a 51 percent average. UMR coasted to a 76-57 victory on the strength of a well-balanced attack including Curtis Gibson's 20-point performance. The Miners dominated every aspect of the game, out-distancing Washington U. in rebounds 50-35, assists 22-12, steals 7-3 and blocked shots 6-3. Cannon finished with 14 points, McDowell 10, Dave Moellenhoff eight, Dinsdale eight, John Pfannkuch eight, Wentz six and Rob Goodenow with two points to round out the scoring.

Springfield, Mo., and the Evangel Tournament were the sites of the Miners' next three games. After dropping the first game 63-94 to the overpowering Oklahoma Christian College team the

Miners fought their way back in the losers bracket to

Ken Donnelly

Curtis Gibson puts in two of his 22 points against Mo.-Valley.

**Lady Cagers**

## Second at Evangel

By NANCY REITER

The Lady Miners have started off their season this year with a 3-and-1 record, and a second-place spot in the Evangel Tournament held over Thanksgiving break.

In their first game, the home opener against School of the Ozarks Friday, Nov. 19, Miner fans saw a close game with UMR finishing up

gain fifth place in the tourney by successive wins against Missouri Bible College and Evangel College.

In the Miners' first loss of the season Oklahoma Christian had the hot hand from the floor and the line as they converted 41-of-75 field goals for a 55 percent average and 12-of-16 free throws for a 75 percent average. The Miners, on the other hand, were as cold as ice from the field converting only 29-of-80 for a 36 percent average.

Oklahoma Christian was led by their one-two punch of Orange and Brown who combined for 48 points. Orange dominated the boards, pulling down 15 rebounds and eight blocked shots while scoring 24 points. Gibson and McDowell were the only Miners in double figures scoring 17 and 10 points respectively.

In the Miners' second game of the tournament they had to go to overtime to defeat Missouri Bible College 71-69. Curtis Gibson and Rickie Cannon were the big scorers for UMR with 24 and 19 points, respectively. Joey McDowell was the "enforcer" on the boards pulling down 18 rebunds to lead all players. UMR converted 26-of-65 field (40

percent average) but the difference in the game came at the line where the Miners put down 19-of-31 (61 percent average). With the Miners committing only 19 personal fouls, Mo. Bible College was kept away from the free-throw line long enough to provide the difference in the game. Mo. Bible College converted 17-of-26 free throws.

In the final game of the tournament the Miners again had to go to overtime to down Evangel College 79-75. UMR found its touch from the field canning 35-of-64 field goals for a 55 percent average. A balanced attack was the strong point for the Miners as four players scored in double figures. Gibson led UMR with 17 points followed by Cannon with 16 points, McDowell with 15 points and Wentz with 14 points. Contributing to a balanced attack, the Miners picked up their highest assist total of the season with 27.

The Miners square off with Lindenwood on Dec. 3 at the Gale Bullman Multi-Purpose Building in a 7:30 p.m. contest. The Miners will have no rest though, with Illinois College traveling to Rolla on Dec. 4 for another 7:30 p.m. contest.

### Gridmen make

## All-Conference

By JOHN GALT

Ten Miners made it to this year's All-Conference squad, with four players named to the first team and six to the second. Four other UMR players made honorable mention.

The first-team choices were seniors Bob Pressly at defensive tackle, Paul Demzik at defensive end, Randy Hauser at cornerback and sophomore Mike Shafer at fullback. Pressly and Hauser were both second-team choices last year and were unanimous selections this season.

The second-team picks for UMR included seniors Kevin Griesmer at offensive

tackle, Dave Stephen at receiver, Dennis Pirkle at quarterback, Todd (Boom) Fizer at linebacker and Bruce Baughman at punter. Junior running back Randy Hauser rounded out the UMR selections.

Those Miners making the honorable mention list were seniors Craig Thomas at kicker, Joe Falke at running back, Doug Kiethly at noseguard and junior Scott Stephens at tight end.

The Miner football team ended its season in a tie for second in the MIAA. Northeast repeated as champions for the second straight year.

Complete team listings are on page 16.

# UMR Swimmers performing well

By GIL KAUFFMANN

The UMR swim team started off its 1982-83 season "swimming very well," according to Coach Bob Pease. On Nov. 19, the Miners took fourth out of seven teams in the second annual Key Sport Shop Classic.

The meet was dominated by the University of Arkansas, with 492 points. Mizzou took second with 321 points, followed by Drury College at 249 and UMR with 166 points. Southwest

Missouri State, Eastern Illinois and Arkansas-Little Rock rounded out the competition.

All teams participating in the meet, with the exceptions of UMR and Drury, are NCAA Division I teams, which accounted for much of the stiff competition.

Good performances in the classic were turned in by Derek Coon, Don Havey, Dave Wisdom and Paul Perichich. Coon placed fourth, fifth and sixth in the 200-, 100- and 50-yard

breaststroke, respectively. Havey took sixth, seventh and eighth in those same races. Wisdom took fourth place in the 100 butterfly and fifth in the 50 fly. Perichich claimed sixth in both the 200 and 400 IM.

The following day, the Miners competed against the same teams in the ninth annual Key Sport Relays. Once again Arkansas dominated, with Mizzou, Drury, Eastern Illinois and UMR taking second through fifth.

The relay team of Coon, Harvey, Wisdom and Aria paced the Miners, finishing third in the 400 medley relay. Wisdom, Scott Carney and Jeff Germer took fourth in the 300-yard butterfly. Perichich, Aria and Ed Kruger placed fourth in the 300 breaststroke.

Coach Pease was pleased with these performances, as well as that of freshman diver Jon Staley, who had scores of 246 points in 1-

meter diving and 258.25 points in 3-meter diving.

Upcoming meets at

Mizzou Dec. 3 and hosting Drury College on Dec. 11, will round out the team's 1982 action. Good luck to co-

captains Mike Shive and Ralph Thielking, as well as the rest of the squad, in their upcoming season.

Rick Bennett

Sigma Pi (above) will go to the volleyball playoffs, along with PIKA, GDI and Sigma Nu.

## Attention Track Athletes

The Miner indoor track season will open on Jan. 29. All interested athletes are encouraged to contact head track coach Dewey Allgood

at the athletic department in the Gale Bullman Multipurpose Building, phone 341-4106.

As has been predicted since the beginning of the semester, THE WORLD WILL END DECEMBER 13th. No one will be able to survive the arrival of the dreaded finals' week and anyone lucky enough to live, will be maimed beyond all recognition. But there is still time for one last FUTILE and INSANE act. On Dec. 9, Delta Sig will hold the "END OF THE WORLD" party from 8 p.m.-1 a.m. Everyone is required to attend.

Dear Voices of Inspiration,

Thank you for all of your love, caring and thoughtfulness. Thanks to friends like you and God on my side I have made it through the most difficult time in my life.

Continue praising the Lord and spreading your love. Good luck next semester and my prayers are always with you! God bless you!

With all my love,  
Cheryl D.S.

# Cagers

In the first game against Friends University on Friday, Nov. 26, the Miners found their ways with a 67-59

win. Schulte was pleased by the ability of freshman Terry Bond to keep her composure early on in the

game, as well as with the team's handling of a pressure defense at the end. The women were down by

three, but came back for the victory. Bond was high-scorer at 14 with Kim Murphy right behind with 12 points. Howard and Bond shared rebounding duties with 13 each.

Saturday UMR suffered its first loss in the championship game against the host Evangel team, which Coach Schulte described as "very tough on its home court." The final score was 76-58. Turnovers seemed to hurt the Miners, as they allowed Evangel to have a 14-point run at one point in the second half. Schulte described the outcome of the game as a combination of UMR playing a poor game and Evangel having a good day on the court. Stover, Howard and Murphy were top scorers with 12, 11 and 10 points, respectively. Stover had the most rebounds, 11.

Murphy earned a spot on the all-tournament team by her performance in the two games.

Coach Schulte was a bit disappointed with the second-place finish and felt her team was, too. They played a tough William Woods team Wednesday, and Lindenwood in St. Louis on Saturday at 5:30. Their next home game is Tuesday, Dec. 7 at 7 p.m.

Intense play in the Miners opener. The Cagers are off to a 4-1 start.

## M-Club

### Athlete of the week

SUBMITTED BY M-CLUB

The M-Club would like to recognize Curtis Gibson of the Miner basketball squad as UMR's outstanding athlete of this week. At the Evangel Tournament, Curtis

scored 58 points in three games and had 20 rebounds, leading UMR to an overall record of 4-1. For his excellent performance, Curtis was named to the all-tournament team.

Congratulations Curtis!

## Grapplers get going

By JACK SUPLEY

The Missouri Miner wrestling team will open its season tonight. The Miners will travel to St. Louis to compete in a dual with Washington University. The team would like to repeat last year's match and start off the season with a victory.

Coach Joe Keeton feels that this year's team is very promising. There are 10 returning lettermen and only one injury. "We are a very

young team and most of them are returning lettermen, therefore we have youth and experience on our side," states Coach Keeton. The team finished third in the conference last year with Keeton being named "Coach of the Year." Team captain Scott Chalmers projected his thoughts for this year, "We had a strong finish at conference last year with a lot of second- and third-place medalists. This year we hope to get a few people through to nationals."

The wrestling team's next outing will be in Warrensburg on Dec. 11 in a dual match against CMS.

Dear Druids,

You are cordially invited to the first annual UMR Druid Roast, Dec. 4. This event will take place at the future sight of Stonehenge at midnight. Master of ceremonies will be Satan, who will also provide the fire.

The Knights of the Realm

P.S. A hot time is guaranteed for all.

To all of the St. Patrick's Board selling products (green) for St. Patrick's Day: It appears to me (as a student) that if you (St. Pat's Board) would stop trying to force your products upon the students, stop trying to "cut them down" for not buying, stop making rude comments and gestures for them not buying and start trying to sell your products by being friendly, nice and not doing the above mentioned, you would most likely sell more products and gain, instead of

lose, potential customers.

Are you going to the Who concert? Do you have room in your car for an extra passenger? Are you a female heterosexual who weighs under 200 pounds and is cute? If you answered yes to two or more of these questions, call Rob at 699-4231.

P.S. They're all WASTED!

Badgered Student

# Soccer, Volleyball playoff action

By LARRY TIPTON

Well, the semester is getting down to its final days, and so are intramurals. Soccer has ended its regular season and is holding final games tonight. Volleyball action ends tonight as well, and playoffs will be next week.

In Division I soccer, Sig Nu met MHA-East,

while Kappa Sig battled Phi Kap in the other semi-final game. A three-way tie for first in Division II, League 2 made it a little more confusing for other playoff games. Sig Pi won the coin toss and faced Sig Chi Mu, while Wesley beat RHA 3-0, and got to play Delta Sig last night.

still going strong. There are no longer any undefeated teams, as Phi Kap defeated GDI and Wesley beat CSA. Sig Pi and Pikers are atop League 1, and GDI and Sig Nu leads League 2 in Division I. CSA and FELA are ahead in their respective leagues in Division II.

Get psyched, and go support your favorite teams

at the playoffs!

I.M. NOTES: Ray Kopsky

of Sigma Pi's soccer team and GDI volleyball are the

player and team of the week. Congratulations!

## MIAA All-Conference Teams

### First Team

#### Offense

Receivers — Rich Otte, senior, Northeast; Darryl Duncan, senior, Lincoln; Richard Vaden, sophomore, Central. Linemen — Paul Eckoff, junior, Northeast; Brian Neubauer, junior, Northeast; Ted Banker, senior, Southeast; Kevin Collins, senior, Northeast; Mark Matthews, senior, Central. Quarterback — Tom Hayes, junior, Northeast. Backs — Mike Shafer, sophomore, UMR; Dale DeBourge, junior, Northeast. Kicker — Dave Austinson, senior, Northeast.

#### Defense

Linemen — Bob Pressly, senior, UMR; Elijah Lockhart, senior, Northeast; Tim Gildehaus, senior, Northeast; Robert Wallace, senior, Central; West Martin, junior, Central. Linebackers — Paul Demzik, senior, UMR; Dan Shelby, junior, Northeast; Darren Smotherson, senior, Lincoln. # IM News

By NANCY REITER

spot and KD in third.

The expanded intramurals front seems to be moving along right on schedule. Volleyball, billiards and table tennis action continue. In League I volleyball play, Chi Omega has opened up a commanding 4-0 lead, as AWS, ZTA and ABS are dominating League II competition at this point.

In billiards, there is only a singles bracket this year for women. So far, Carol Morse of TJ has won the winner's side of the bracket, and will play Becky Kovarik from Stardusters for the championship.

The table tennis tournament is still too young to call.

Singles tennis has finally wrapped up with TJHA on top with AWS at the No. 2

## 12th Man Award

Some years ago at a Texas A&M football game, the star player of the team was hurt and no substitute could be found. An enthusiastic fan volunteered to take the injured player's place on the field, allowing the team to go on to victory. Such is the history of the 12th man; and it is also the inspiration for the M-Club 12th Man Award. The award is given annually to the organization which displays the most fervent support for Miner football.

This year the award was given (for the third year in a row) to Delta Sigma Phi. The award was presented at the last Miner football game against SEMO, Nov. 9. Delta Sig 12th Man Chairman Ray Slesinski noted, "We all worked hard, but it was worth it; a good time was had by all." Congratulations to Delta Sig in their support of our team.

## Nothing Else Feels Like Navy Flying.

The thunderous roar of jet engines rolls across the carrier's flight deck.

Throttles are at full power, and you're waiting for the signal to launch.

Now. The catapult fires. G forces press you back into your seat. Suddenly, you're flying low and fast over the open sea. Zero to 150 in 2.5 seconds.

Nothing else feels like Navy flying. Nothing. And when you become a pilot or flight officer you're at the very heart of it.

Once you've earned your wings, the Navy puts you in full control of a multi-million-dollar supersophisticated combination of jet aircraft and electronic wizardry.

And Navy training makes sure you're up to the challenge. Rigorous flight training gives you the navigation, aerodynamics and other technical know-how you need.

Leadership and professional schooling prepare you for the immediate decision-

making authority and management responsibility you have as an officer in the Navy.

On the ground, as a Navy officer, you work with and supervise today's most highly

skilled aviation professionals. In the air, as part of the naval aviation team, you have about the most exciting job anyone can have.

It's a uniquely rewarding job with pay to match. You start at \$18,000 a year — more than the average corporation pays you just out of college. After four years, with regular Navy promotions and pay increases, your annual salary climbs to \$30,400. That's over and above a full package of benefits and privileges.

Find out how much more a job in naval aviation has to offer. Fill in the coupon. No other job gives you the kind of leadership experience or fast responsibility you get as part of the naval aviation team. And nothing else feels like Navy flying.
